

## USE OF REPORTING AND GRAPHING FUNCTIONS IN BANKLINK

Are you currently using BankLink and would like to be able to generate some meaningful reports and graphs at the click of a button throughout the year?

Banklink has the capability of producing cash flow reports, profit and loss statements, a balance sheet and trial balance. You can also generate graphs showing sales, payments and trading results for specified periods. The benefit of these reports and graphs is that they can be done instantly anytime during the year, giving you an indication of how you are travelling and any possible improvements or actions that can be done to improve.

If you would like us to set up your BankLink file to enable this useful function, please contact Steven Kassulke on 3233 6400.

This newsletter does not give business, accounting, taxation or financial planning advice. It is intended to provide information in a summary form and is general in nature. The contents do not constitute business, accounting, taxation or financial planning advice and should not be relied upon as such. Formal business, accounting, taxation or financial planning advice should be sought in particular matters.
